Art Unit: 2652

1. Applicant's election without traverse of the species of figure 1, stating claims 1-4 and 6 to read thereon, in the reply filed on 3/7/05 is acknowledged.
2. Claim 5 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 3/7/05.
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 4, and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by MEGURO (6,198,598).

Note figures 2 and 9. MEGURO shows a 3.5 inch (see column 3 lines 18-21) magnetic disk cartridge with an outer casing (31,32) having head slots (37) and dust removing liners (51,52). The liners are attached using adhesive or welding, and for the embodiment of figure 9, the application points are located inside the outer periphery of the liners, thus leaving an outer circumferential portion that is not fixed to the inner surface of the casing (see column 4 lines 4-36).

Art Unit: 2652

5. Claim 6 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim, or amend the claim to place the claim in proper dependent form.

It appears that claim 6 should depend from claim 5. If it is so amended, it would be drawn to the non-elected species and would be withdrawn from further consideration.
